Management and the Board of Trustees
Guam Educational Telecommunications Corporation

In planning and performing our audit of the financial statements of the Guam Educational Telecommunications Corporation (PBS Guam) as of and for the year ended September 30, 2021, in accordance with auditing standards generally accepted in the United States and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, we considered its internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of PBS Guam's internal control. Accordingly, we do not express an opinion on the effectiveness of PBS Guam's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented or detected and corrected on a timely basis. A significant deficiency is a deficiency, or combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

During our audit, we noted the following deficiency in internal control (as described above):

Deficiency

Equipment Management purchased with Federal Awards

Observation:

During our control testing of equipment purchased with Federal Awards, we noted seven (7) of the thirty (30) samples did not have the Federal or PBS equipment tags.

Recommendation:

We recommend that management enforce that the Federal and PBS tags are mounted to equipment as soon as they are in service.

This communication is intended solely for the information and use of management, the Board of Trustees and others within PBS Guam and is not intended to be and should not be used by anyone other than these specified parties.

We would be pleased to discuss the above matters or to respond to any questions, at your convenience.

Very truly yours,

Ernst + Young LLP
